

# Section links block

The section links block helps the learner or trainer to quickly navigate to a particular topic/week section of the course (depending on the course format).

## Settings

As well as the common settings found on all [blocks](#), within the section links block you can also find the settings below. These allow you to set how many sections are displayed and whether to use numbers of topic titles.

Setting	Description	Notes
Number of sections	Once the number of sections in the course reaches this number then the increment by value is used.	-
Increase by	This is the value the section is incremented each time a section link is displayed starting at 1.	-
Alternative number of sections	Once the number of sections in the course reaches this number then the alternative increment by value is used.	-
Alternative increase by	This is the value the section is incremented each time a section link is displayed starting at 1.	-
Title display as	Decide whether to display as: <ul style="list-style-type: none"><li>• Number only</li><li>• Title only</li><li>• Title and number</li></ul>	-
