

Seminar management

Seminar Management describes all the features and functionality available within the Seminars module. Seminars enable Site Administrators and Trainers to create, manage and report upon in-person/ classroom-based events and build a blended training delivery into learning programs.

A **Seminar activity** may hold one or many **Events** which may be made up of one or several **Sessions**. Each **Session** has a start and finish day and time and may be tied to a specific **Room** and any number of **Assets**. Sessions can also have a **Facilitator** assigned.

Totara Academy

The Totara Academy has a whole course dedicated to using [Seminar Management](#) in Totara Learn. Here you can learn more about how to use seminars, see best practice, and give it a go yourself.
