

Site Appearance

You can customise your site's appearance to reflect the needs of your organisation by editing the theme and adding blocks.

Theme

By customising the theme you can determine the site's look and feel with a personalised colour scheme and your organisation's logo. A theme can be applied across the whole site, user, course, or category level and can be also be applied to different devices.

Blocks

Blocks appear on the left and/or right side of the screen and can contain a range of useful information, from course progress to calendar information. Some blocks work with course activities to present information and others use either external information or can be fully customised (such as HTML blocks).
