

Seminars

Seminar Management describes all the features and functionality available within the Seminars module. Seminars enable administrators and trainers to create, manage and report upon in-person /classroom based events and build a blended training delivery into learning programs.

A **Seminar activity** may hold one or many **Events** which may be made up of one or several **Sessions**. Each **Session** has a start and finish day and time and may be tied to a specific **Room** and any number of **Assets**.
